 Mumbai, India2

PROFESSIONAL SUMMARY

Entry-level cybersecurity professional with hands-on experience in security monitoring, vulnerability assessment, and web application security testing. Actively performing VAPT and SOC labs involving reconnaissance, exploitation, log analysis, and incident response using tools such as Nmap, Burp Suite, SQLmap, Metasploit, and Splunk (lab environments). Strong understanding of OWASP Top 10, networking fundamentals, and attacker methodologies. Seeking entry-level Security Analyst / SOC Analyst / VAPT Trainee roles.

TECHNICAL SKILLS

- Cybersecurity Domains
SOC Fundamentals • Vulnerability Assessment & Penetration Testing (VAPT)
 - Web Application Security (OWASP Top 10) • Incident Detection & Response (Basic) • OSINT & Reconnaissance • GDPR Compliance • ISO 27001 Compliance.
 - Tools & Technologies
Nmap • Burp Suite • SQLmap • Metasploit • Wireshark • Nikto • Splunk (SIEM – Labs) • Kali Linux • Windows • MobSF • Aircrack-ng
 - Networking
TCP/IP • DNS • HTTP/HTTPS • Ports • Protocols • Firewalls.
 - Reporting
Vulnerability Documentation • Risk & Impact Analysis (CVSS – Basic)
-

EXPERIENCE

Cyber Security Intern — Thane Cyber Police Station

July 2025 – Present

- Assisted in investigations of phishing, financial fraud, and identity theft cases
 - Analyzed digital evidence including emails, IP logs, and mobile forensic data
 - Supported on-field cybercrime investigations and digital device seizures
 - Performed preliminary threat analysis and fraud pattern identification
 - Documented investigation findings for internal technical reports
-

HANDS-ON PROJECTS (SECURITY LABS)

Web Application Vulnerability Assessment

- Conducted VAPT on intentionally vulnerable web applications (DVWA / OWASP Juice Shop)
- Identified and validated SQL Injection, XSS, IDOR, and authentication vulnerabilities
- Used Burp Suite and SQLmap for traffic interception and exploitation
- Prepared structured vulnerability reports including impact assessment and remediation.

Network Vulnerability Assessment

- Performed network scanning and service enumeration using Nmap
 - Identified misconfigurations and vulnerable services in controlled lab environments
 - Demonstrated exploitation using Metasploit
 - Documented findings following standard VAPT methodology
-

EDUCATION

B.C.A (Computer Application) — Tilak Maharashtra Vidyapeeth
CGPA: 7.13 | Percentage: 71.30%

HSC — R.A. Podar College of Commerce & Economics
Percentage: 80.50%

SSC — Holy Cross High School
Percentage: 69.80%

CERTIFICATIONS

Cyber Security & Ethical Hacking — DcodeTech (Industrial Training)

ADDITIONAL INFORMATION

- **Actively building hands-on cybersecurity projects and labs**
- **Strong documentation skills and ability to work under pressure**
- **Highly motivated to grow within cybersecurity and VAPT domains**
