

ROHAN RAJENDRA MATE

Cybersecurity Analyst | VAPT & Penetration Testing | SOC Fundamentals

rohanog59@gmail.com | +91 7304166348 | [linkedin.com/in/rohan-mate-86556a222/](https://www.linkedin.com/in/rohan-mate-86556a222/) | [rohan-1306.github.io](https://github.com/rohan-1306) | github.com/rohan-1306 | Mumbai, India

PROFESSIONAL SUMMARY

Entry-level cybersecurity professional focused on Vulnerability Assessment and Penetration Testing (VAPT), with hands-on experience from a cybersecurity internship at Thane Cyber Police Station and a self-built Active Directory attack range. Proficient in reconnaissance, exploitation, and vulnerability reporting using Nmap, Burp Suite, Metasploit, and SQLmap, with a working grasp of OWASP Top 10 and Windows/AD attack paths. Seeking an entry-level VAPT / Penetration Testing / Security Analyst role.

TECHNICAL SKILLS

- VAPT & Offensive Security: Web, Network & Mobile VAPT • Active Directory Attack Paths (Kerberoasting, ACL Abuse) • OSINT & Reconnaissance • OWASP Top 10
- Tools: Kali Linux • Burp Suite • Metasploit • Nmap • Wireshark • SQLmap • Nikto • MobSF • Aircrack-ng • Splunk (SIEM – Labs)
- Networking: TCP/IP • DNS • HTTP/HTTPS • Firewalls • Active Directory
- Reporting: Vulnerability Documentation • CVSS (Basic) • Risk & Impact Analysis

PROJECTS

GOAD-Light: Active Directory Attack Range

Self-directed lab | Portfolio: [rohan-1306.github.io](https://github.com/rohan-1306)

- Designed and deployed a 4-VM Active Directory lab (DC01, WS01, WS02, Kali) on VirtualBox Host-only networking replicating a corp.local domain
- Engineered three intentional misconfigurations — Kerberoastable SPN, GenericAll ACL abuse, and cached Domain Admin credentials — to model real attack paths
- Executed the full attack chain from Nmap enumeration through Domain Admin compromise and documented the methodology end-to-end

Web Application VAPT — DVWA / OWASP Juice Shop

- Conducted VAPT on intentionally vulnerable web applications; identified and validated SQL Injection, XSS, IDOR, and authentication vulnerabilities
- Used Burp Suite and SQLmap for traffic interception and exploitation; prepared structured vulnerability reports with impact assessment and remediation guidance

Cybersecurity Portfolio Site

- Built and deployed a single-page cybersecurity portfolio (HTML/CSS/JS) on GitHub Pages, structured around pentest phases — recon, profile, arsenal, findings, contact

EXPERIENCE

Cyber Security Intern — Thane Cyber Police Station

July 2025 – June 2026

- Investigated a fraudulent RTO challan APK case, identifying SMS-forwarding malware behaviour tied to credential theft, from intake through findings
- Assisted in investigations of phishing, financial fraud, and identity theft cases; analysed digital evidence including emails, IP logs, and mobile forensic data
- Supported on-field cybercrime investigations and digital device seizures; documented findings for internal technical reports.

EDUCATION

B.C.A (Computer Application) — Tilak Maharashtra Vidyapeeth

CGPA: 7.13 / 71.30%

HSC — R.A. Podar College of Commerce & Economics

80.50%

SSC — Holy Cross High School

69.80%

CERTIFICATIONS

- eJPT (eLearnSecurity Junior Penetration Tester) — In Progress
- Cyber Security & Ethical Hacking — DcodeTech (Industrial Training)
